

Lift up without missing a delicious fried time! Subtle difference of fried condition is performed by simple operation.

World first
Auto lift function is normally provided into IH fryer!

Electromagnetic auto lift fryer is compatible with the specification of the description of the Minister of Land, Infrastructure and Transport Secretariat Government Buildings Department supervision "public building construction standard specifications" (machine facility work).

A part-time worker can also achieve the same fried condition as a veteran worker does.

A fry basket automatically can be lifted up with the preset cooking time. Even a part-time worker can perform fried cooking without mistaking fried time which is different for each menu, not only contributing to energy-saving, but also keeping a uniform taste. Subtle adjustment such as extension of cooking time during cooking and after cooking is also possible.

10 menus program function.

Up to 10 menus can be memorized for setting oil temperature (Between 100 to 220°C) and cooking time (Between 10 sec to 99 min 50 sec) according to your store's recipe. Hot-selling menu and so on can be operated with a single touch just by pushing a menu button. A control panel of digital display is easy to read and accurate. It can be handled easily.

Save mode is economical to prevent the deterioration of the oil.

Save mode is switched in a state when the save switch is turned ON or in the case of non-use situation for 30 minutes. Keeping oil temperature to be 15 degrees lower than the preset temperature will prevent the deterioration of oil. It is economical.

Useful "Melt Function" to use the solid oil. (Lard heating)

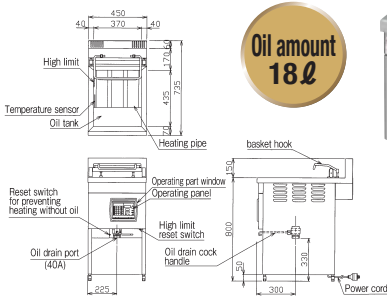

Melt function (lard heating) to gradually dissolve solid oil is equipped. It is very useful when you use solid oil such as lard.

MIF-18LC

List Price : ¥668,000 (tax-excluded)

Oil amount
18ℓ

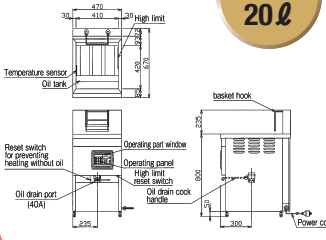

Up-and-down lift type

MIF-20SL

List Price : ¥748,000 (tax-excluded)

Oil amount
20ℓ

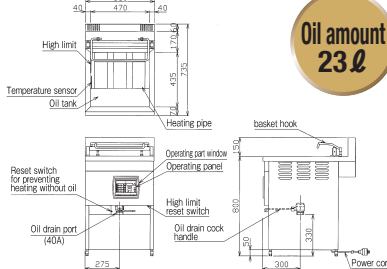

Since you can raise and lower the lift in a minimum of space, a fry basket can be enlarged up to the size of oil tank. Compared with other products of equivalent oil amount, you can cook a lot of ingredients at the same time. The depth is also compact with 670mm.

MIF-23LC

List Price : ¥828,000 (tax-excluded)

Oil amount
23ℓ

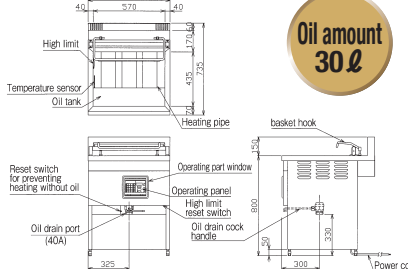

MIF-30LC

List Price : ¥898,000 (tax-excluded)

Oil amount
30ℓ

Low-frequency IH auto lift fryer Specifications Table

■The delivery time is about 3 weeks after receiving an order.

Model	External dimension (mm)			Oil amount (ℓ)	Power (50/60Hz)	Power consumption (kW)	Necessary hand switch capacity	Power cord	Weight (kg)	Accessories
